Hello Gents,

Attached is the link to a map that displays our recommended camera locations. One recommendation shared with me re: placement was to move some of the cameras capturing departing traffic from the city to various locations within the city. There is a total of seven of these cameras. Please take a moment to examine the locations we selected. I would like to meet as a group one more time next week to finalize our recommendations. You can follow the instructions listed below to access the map.

On a side note, Commander Cohen is working on securing many more cameras in the near future that should help with coverage.

Thank you,
Terry

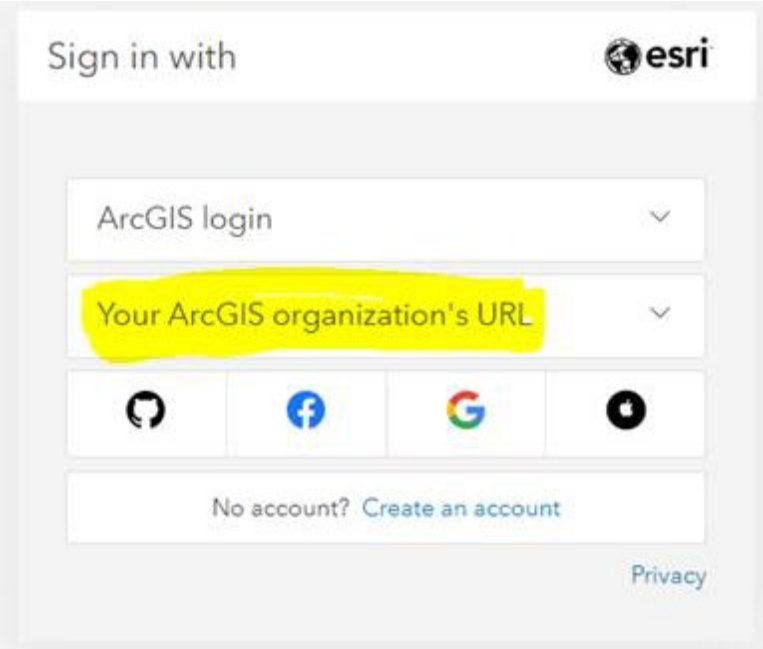
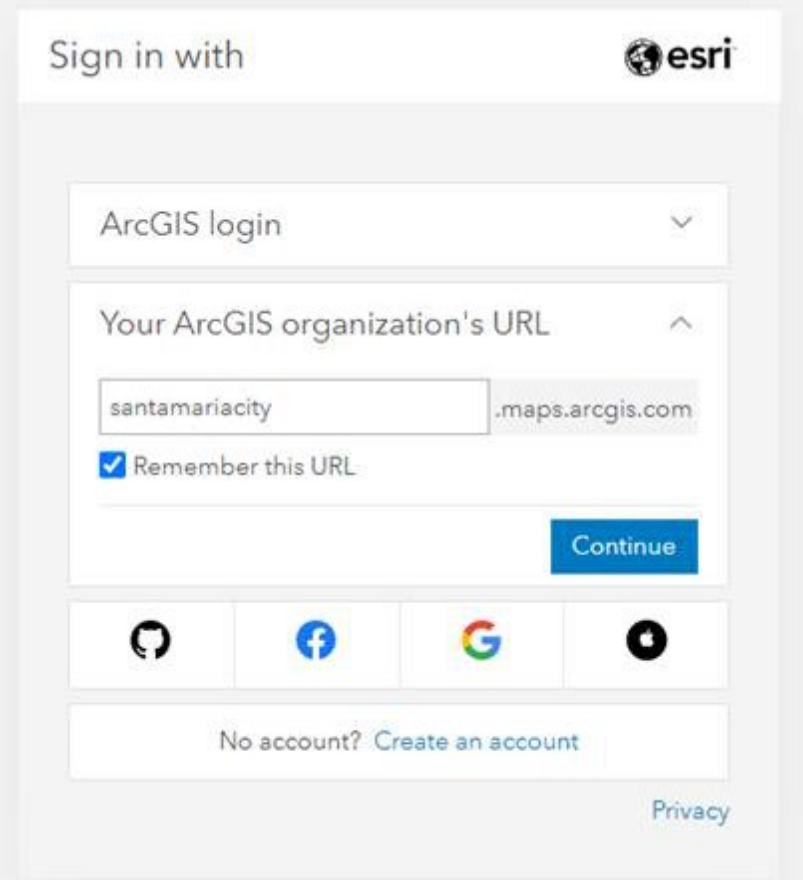
Hi Terry! All members have been added to the City of Santa Maria AGOL system. Here are instructions for their first time logging in (this will only have to be done once). If there are any questions, just let me know. I also created a group for your team and set the map sharing to the owner (Javier) and your group instead of it being accessible to the entire CoSM Organization. I am currently the owner of the group since I created it but I can change that to you or whoever would be appropriate.

Click on this link: https://arcg.is/zSqLb

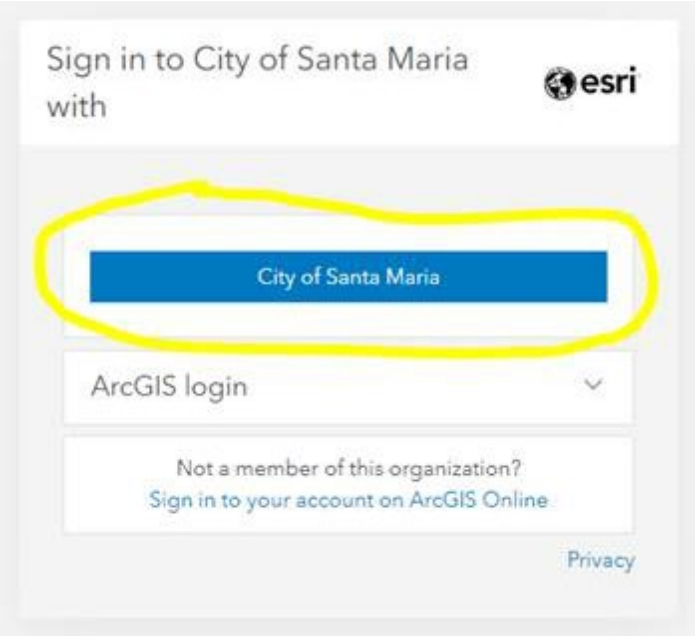
1. This should take you to a sign in window, click on Your ArcGIS organization's URL



2. Type in santamariacity just how you it in the image below. Check the box Remember this URL



3. Click on the blue City of Santa Maria



Sign in to City of Santa Maria with
esri
City of Santa Maria
ArcGIS login
Not a member of this organization?
Sign in to your account on ArcGIS Online
Privacy

4. Now on the right you will see Open in Map Viewer (in blue). Click on that and it will open the map

---

Lt,

Below is the quick link to the city map with LPR layer.

Thank you.
